## New air2guide™ Product Family for Heating, Ventilation and Air Conditioning (HVAC)

WIKA's air2guide™ series offers a comprehensive range of filter and ventilation monitoring systems, including differential pressure gauges (mechanical and electronic) for filter monitoring, incline tube manometers, differential pressure switches, differential pressure transmitters and air flow velocity transmitters for measuring the volume flow and air velocity in air ducts.

The product range is completed by a volatile organic compounds (VOC) air quality sensor and a CO<sub>2</sub> sensor, used to measure VOC and carbon dioxide (CO<sub>2</sub>) content in the air.

The air2guide™ series is ideal for developers, manufacturers and end users of ventilation systems in industrial and administrative buildings or manufacturers of central HVAC systems. These products are available in industry-standard measuring ranges. The main products for filter monitoring come in ranges from 0...0.2 InWC up to 0...50 InWC.

In addition, we offer compound ranges from -0.1 InWC...+0.1 InWC up to -6 InWC...+6 InWC. The mechanical differential pressure gauges, with or without an electronic output signal, are identical in design and offer the following advantages over the competition:

- Easy to install and remove
- Up to 50% time savings during installation, compared with competitive conventional models
- Innovative two-part modular design, unique to the industry
- 3-year limited warranty

# Mechanical Differential Pressure Gauges

## Types A2G-10 / A2G-15

### Applications

- For dry, clean, non-aggressive gases, mainly air
- Monitoring of blowers and ventilators
- Filter monitoring via differential pressure
- Positive overpressure in clean rooms
- Positive and negative pressure in isolating chambers

### Product Features

- Easy to install
- Two-part modular design
- With integrated o-ring on mounting case for installation in air ducts
- 4-20 mA 2-wire or 0-10 V 3-wire output signal (A2G-15)
- Standard accessories

**A2G-10**  
(panel mount)

**A2G-15**  
(surface mount)

**air2guide<sup>P</sup>** gauges are ideally suited for the measurement of low pressure and differential pressure from 1...50 InWC. A benefit of the modular design is a two-part assembly that separates the measuring system from case components. This allows the replacement of only the measuring system, which provides reduced repair costs. The panel mount version of the **air2guide<sup>P</sup>** is extremely easy to install and requires no tools (over 50% time savings compared to conventional instruments).

In addition to the local display, the **air2guide<sup>P+E</sup>** features an electronic output signal. The **air2guide<sup>P+E</sup>** is available with a 2-wire (4...20 mA) or 3-wire (0...10 V) output signal. This gauge is ideal for applications where a remote monitoring or evaluation is needed. They are ideally suited for the measurement of positive and negative overpressure or differential pressures from 0.2 InWC up to 50 InWC.

### Technical Data - air2guide<sup>P</sup>, air2guide<sup>P+E</sup>

Nominal size	4-1/2"
Accuracy	± 3% of full span
Ranges	0 / 0.2 InWC up to 0 / 50 InWC Compound ranges starting from -0.1 / +0.1 InWC Other pressure units and dual scales are available
Maximum working pressure	80 InWC
Temperature	Ambient from -22 °F ... 176 °F Media from 3 °F ... 122 °F
Ingress protection	NEMA 3 (NEMA 4 optional)
Process connection	2 x G1/8 female (comes standard with 1/8" / 3/16" hose barb adaptors)
Sensing membrane	Silicone rubber
Movement	Frictionless magnetic transmission
Dial	Aluminum
Pointer	Plastic black
Set pointer	Plastic red
Window	Makrolon
Mounting case	Black thermoplastic, high impact resistant
Output signal (A2G-15 only)	4-20 mA, 2-wire or 0-10 V 3 wire system
Supply voltage (A2G-15 only)	15...35 VDC
Electronic connection (A2G-15 only)	PG gland M12
Standard accessories	3 case mounting screws, straight or angled hose barb adaptors 1/8" / 3/16" standard (1/4" optional)

# Air Velocity Transmitter

## Type A2G-20

### Applications

- Building automation and process control systems
- Supply and exhaust fan tracking
- Clean room control systems

### Product Features

- Three air velocity ranges and one temperature range, selectable by jumpers
- Separate outputs for air velocity and temperature
- Two output signals (4...20 mA and 0...10 V) in one instrument
- Comes standard with duct mounting flange
- Simple installation

The **air2guide<sup>v</sup>** air velocity transmitter is ideal for measuring air velocity and temperature in HVAC systems and control applications, especially in building automation and energy management systems. The **air2guide<sup>v</sup>** offers three air velocity ranges-one temperature range and two output signals-within one instrument at one very low cost. The **air2guide<sup>v</sup>** calculates the air velocity based on measuring the heat loss between the two sensing elements. Due to the design of the two measuring elements, the **air2guide<sup>v</sup>** is basically immune from drifts, making this transmitter very accurate over the whole range (+/- 5% accuracy).

### Technical Data - air2guide<sup>v</sup>

<b>Nominal size</b>	3-3/4 x 3-1/2"
<b>Ranges / Accuracy</b>	Air Velocity: 0...390 FPM (2 m/s): < 19.6 FPM (0.1 m/s) ± 5% of measured value 0...1,970 FPM (10 m/s): < 98.1 FPM (0.5 m/s) ± 5% of measured value 0...3,940 FPM (20 m/s): < 196.2 FPM (1 m/s) ± 5% of measured value Temperature: 32...122 °F (0...50 °C): < 1.2 °F (< 0.5 °F)
<b>Design standards</b>	EMC directive 2004/108/EC RoHS directive 2002/95/EC Low voltage directive 2006/95/EC WEEE directive 2002/96/EC
<b>Measuring elements</b>	Pt1000 and NTC 10k
<b>Ingress protection</b>	NEMA 3 (IP 54)
<b>Case material</b>	ABS plastic
<b>Output signal</b>	Air Velocity: 0...10 V (linear to FPM), load min. 1 kOhm or 4...20 mA (linear to FPM), load max. 400 Ohm Temperature: 0...10 V (linear to °F), load min. 1 kOhm or 4...20 mA (linear to °F), load max. 400 Ohm
<b>Supply voltage</b>	24 V AC / DC ± 10%
<b>Electrical connection</b>	PG gland M16

# Type A2G-25

## Applications

- Measuring the volume flow in ventilation ducts for air and non-combustible gases
- Used for fans and ventilators of various manufacturers
- Monitoring of air volume flow or pressure directly on the air handling unit

## Product Features

- Very user-friendly display
- Output signals for differential pressure and air volume flow
- Clearly legible LCD display
- Temperature compensated
- Easy installation
- Standard accessories included

The **air2guide F** air flow meter is used to show the flow output to determine the overall air consumption of a plant and/or the consumption of individual production units. The **air2guide F** is designed for centrifugal fans equipped with inlet rings. The air volume flow measurement is based on the differential pressure value measured at the fan. The **air2guide F** can be used to display the flow value at the site and to send the output value to a control system. The **air2guide F** can be used to measure volume flows of up to 880,000 GPM.

Technical Data - air2guide F	
Nominal size	3-3/4 x 3-1/2"
Ranges / Accuracy	0... 4 InWC (1,000 Pa): ± 0.02 InWC (5 Pa) & ± 1.5% of display 0... 8 InWC (2,000 Pa): ± 0.02 InWC (5 Pa) & ± 1.5% of display 0...20 InWC (5,000 Pa): ± 0.03 InWC (7 Pa) & ± 1.5% of display 0...28 InWC (7,000 Pa): ± 0.03 InWC (7 Pa) & ± 1.5% of display
Selectable units on display	GPM, LPM, m3/s, m3/h, CFM, SCFH, mbar, mmWC, InWC, kPa or Pa
Measuring elements	Piezo sensor
Ingress protection	NEMA 3 (IP 54)
Case material	ABS plastic
Output signal	Volume: 0...10 VDC, Load R minimum 1 kOhm, linear to adjusted output unit 0...10 VDC, Load R minimum 1 kOhm, linear to adjusted output unit Pressure: 0...10 VDC, Load R minimum 1 kOhm linear to adjusted output unit
Temperature limitations	Ambient -4...+160 °F Media +23...+122 °F
Supply voltage	24 V AC/DC ± 10%
Electrical connection	PG gland M16
Weight	5.2 ounces (150 grams)
Mounting type	Wall mounting
Standard accessories	2 mounting screws, 2 plastic duct connectors, 3 feet PVC tube (1/8" / 3/16" inner diameter)

# Differential Pressure Incline Tube Manometer

## Type A2G-30

### Applications

- Monitoring differential pressure of air and other non-combustible non-aggressive gases
- Monitoring of ventilators, fans and filters in climatic chambers and clean rooms
- Filter monitoring in paint booths

### Product Features

- Easy to install
- Leakage protection
- Scale easy to read
- Fast and easy zero point adjustment
- Standard accessories included

The **air2guide** <sup>P i-tube</sup> manometer is suitable for measuring overpressure, negative pressure and differential pressure, continually and accurately. A precise zero point adjustment is undertaken by changing the volume at the zero adjustment knob. The manometer is specially designed to prevent leakage of the indicator fluid in case of overpressure. The manometer should be mounted on a vertical surface.

### Technical Data - air2guide <sup>P i-tube</sup>

<b>Nominal size</b>	8-1/4 x 5-1/2 x 1-3/8" (210 x 140 x 35 mm)
<b>Range / Accuracy</b>	0...2.4 InWC / Accuracy 0.02/0.10 InWC
<b>Fluid liquids</b>	Red, s.g. 0.786 kg/dm (60 °F) Blue (0/6 InWC only), s.g. 1.87 kg/dm (60 °F)
<b>Measuring elements</b>	Pt1000 and NTC 10k
<b>Temperature</b>	-40...+140 °F
<b>Materials</b>	Case ABS Cover PMMA Screws polycarbonate Sealing rings NBR
<b>Max. working pressure</b>	30 PSI (800 InWC)
<b>Weight</b>	14 ounces (400 grams)
<b>Standard accessories</b>	2 mounting screws Red fill fluid 1 oz. bottle (30 ml) Red and green pressure limit label 9 feet PVC tube (1/8" / 3/16" inner diameter)

## Type A2G-40

### Applications

- Ideal for use with air and other non-combustible gases
- Monitoring of air filters, fans, industrial cold air circuits, air flow in air ducts and the control of air and fire shutters
- Overpressure monitoring of clean rooms and laboratories

### Product Features

- Compact size
- Easy mounting and installation
- Robust housing and functional design
- Field adjustable switch point
- Very reliable, with over 1,000,000 switching cycles
- Standard accessories included

air2guide<sup>s</sup>

The **air2guide<sup>s</sup>** is an adjustable differential pressure switch (SPDT) used for measuring overpressure, negative pressure or differential pressure of air or other non-combustible, non-aggressive gases. The blue adjustment dial allows for easy setting of the switch point on site. The switch can be set up as a N/O or N/C contact. The compact size, adjustment dial and low cost make the **air2guide<sup>s</sup>** the ideal choice for HVAC applications.

Technical Data - air2guide <sup>s</sup>	
Nominal size	3-7/8 x 4-1/8 x 2-1/2" (73 x 105 x 63 mm)
Ranges / Dead band	See table below
Maximum working pressure	200 InWC
Switch type	SPDT (single pole double throw)
Ingress protection	NEMA 3 (IP 54)
Material	Diaphragm: Silicone Case: ABS Window cover: Clear polycarbonate Duct connectors: ABS Tubing PVC: Soft
Switch rating	2A / 250 VAC
Resistive load	3A / 250 VAC except for: Range 0.08 to 0.8 InWC: 0.1A / 250 VAC Range 2.00 to 18.0 InWC: 5A / 250 VAC
Temperature limitations	Ambient -40...+185 °F Media -4...+160 °F
Electrical connection	PG gland M16
Weight	5.2 ounces (150 grams)
Mounting type	Wall mounting
Standard accessories	2 mounting screws, 2 plastic duct connectors, 6 feet PVC tube (1/8" / 3/16" inner diameter)

Set Point Range InWC (Pa)	Switching Increments InWC (Pa)	Approx. Dead Band at min. Set Point InWC (Pa)	Approx. Dead Band at max. Set Point InWC (Pa)
0.08 to 0.80 (20...200)	0.04 (10)	± 0.02 (5)	± 0.08 (20)
0.12 to 1.20 (30...300)	0.08 (20)	± 0.02 (5)	± 0.12 (30)
0.12 to 2.00 (30...500)	0.08 (20)	± 0.02 (5)	± 0.12 (30)
0.16 to 2.40 (40...600)	0.12 (30)	± 0.02 (5)	± 0.12 (30)
0.40 to 6.00 (100...1500)	0.30 (80)	± 0.04 (10)	± 0.20 (50)
2.00 to 18.0 (500...4500)	0.70 (180)	± 0.20 (50)	± 0.80 (200)

# Differential Pressure Transmitter

## Type A2G-50

### Applications

- Measuring the differential pressure ducts of air and other non-combustible and non-aggressive gases
- Monitoring of air filters, fans, industrial cold air circuits, flows in ventilation ducts and to control the fire prevention flaps in fire shutters
- Monitoring of overpressure in clean rooms and laboratories
- Monitoring of overpressure in containment systems

### Product Features

- Eight selectable pressure ranges
- Two output signals in one instrument
- Zero reset button
- Adjustable response time
- Standard accessories included

The **air2guide** <sup>E</sup> differential pressure transmitter is equipped with a piezo pressure sensor. This compact differential pressure transmitter combines excellent performance and high quality at a competitive price. The **air2guide** <sup>E</sup> comes standard with eight selectable pressure ranges and the user can choose between two output signals. A digital display for local pressure indication is available in a kit and can be installed at the site by the user. No removal of the transmitter is needed for this easy modification.

### Technical Data - air2guide <sup>E</sup>

<b>Nominal size</b>	3-3/4 x 3-1/2"
<b>Ranges</b>	Option 1: 0/10 InWC (factory set) 7 additional ranges to select from via jumper: -0.4...+0.4 InWC, 0...0.4 InWC, 0...1 InWC, 0...2 InWC, 0...4 InWC, 0...6 InWC and 0...8 InWC Option 2: 0/28 InWC (factory set) 7 additional ranges to select from via jumper: 0...4 InWC, 0...6 InWC, 0...8 InWC, 0...10 InWC, 0...12 InWC, 0...16 InWC and 0...20 InWC Option 3: -0.2...+0.2 InWC (factory set) Additional range to select from via jumper: -0.4...+0.4 InWC
<b>Maximum working pressure</b>	100 InWC
<b>Accuracy</b>	± 1.5% of full span
<b>Measuring element</b>	Piezo sensor
<b>Ingress protection</b>	NEMA 3 (IP 54)
<b>Case material</b>	ABS plastic
<b>Output signal</b>	Selectable at unit from 0...10 VDC 3-wire or 4...20 mA 2-wire
<b>Temperature limitations</b>	Ambient: -4...+160 °F Media: +14...+122 °F
<b>Supply voltage</b>	24 V AC/DC V 10%
<b>Electrical connection</b>	PG gland M16
<b>Weight</b>	5.2 ounces (150 grams)
<b>Mounting type</b>	Wall mounting
<b>Standard accessories</b>	2 mounting screws, 2 plastic duct connectors, 3 feet PVC tube (1/8" / 3/16" inner diameter)

## Type A2G-55

### Applications

- Measuring the differential pressure ducts of air and other non-combustible and non-aggressive gases
- Ideal for the building automation to monitor air ventilation ducts and air filters
- Monitoring of overpressure in clean rooms and laboratories
- Monitoring of overpressure in containment systems

### Product Features

- Easy installation
- Maintenance free
- Compact and robust construction
- Comes without accessories

The **air2guide** <sup>®</sup> ECO differential pressure transmitter is equipped with a piezo resistive pressure sensor. This compact differential pressure transmitter is a cost-efficient version of the standard transmitter. This transmitter features a limited number of basic functions. It can be ordered in ranges from 0...1 InWC up to 0...25 InWC. The **air2guide** <sup>®</sup> ECO is available with 0...10 VDC, 3-wire or 4...20 mA 2-wire output signal.

### Technical Data - air2guide <sup>®</sup> ECO

<b>Nominal size</b>	2-1/2 x 2 x 1-3/8" (65 x 50 x 35.5 mm)
<b>Ranges</b>	0...1 InWC (250 Pa), 0...2 InWC (500 Pa), 0...3 InWC (750 Pa) 0...4 InWC (1,000 Pa), 0...5 InWC (1,250 Pa), 0...10 InWC (2,500 Pa), 0...15 InWC (3,750 Pa), 0...20 InWC (5,000 Pa) and 0...25 InWC (6,250 Pa)
<b>Max. working pressure</b>	Ranges 0...1 InWC up to 0...3 InWC: 20 InWC Ranges 0...4 InWC up to 0...25 InWC: 5 times of full scale
<b>Accuracy</b>	Linearity error ± 1.0% of full span Measuring accuracy at +32...122 °F: ± 3.0% of full span Measuring accuracy at +14...122 °F: ± 5.0% of full span
<b>Measuring element</b>	Piezo resistive sensor
<b>Ingress protection</b>	NEMA 3 (IP 54)
<b>Material</b>	Case: ABS plastic Hose barb connectors: Stainless steel
<b>Output signal</b>	0...10 VDC 3-wire or 4...20 mA 2-wire
<b>Temperature limitations</b>	Ambient -4...+160 °F Media +14...+122 °F
<b>Supply voltage</b>	13...32 VDC
<b>Electrical connection</b>	PG gland M16
<b>Weight</b>	8.7 ounces (250 grams)
<b>Mounting type</b>	Wall mounting

# Duct / Immersion Temperature Sensor

## Type A2G-60

### Applications

- For temperature measurement of gaseous media in HVAC systems
- Designed to be used with PLCs and other control and display panels
- Can be used with liquid media if installed inside a thermowell

### Product Features

- Easy installation
- Six selectable temperature ranges
- Can be mounted directly into the process (gaseous media only)
- Compact and robust design
- Comes standard with mounting flange

The **air2guide**<sup>™</sup> duct / immersion temperature sensor is fitted with two Pt1000/Ni1000 RTD sensors. The **air2guide**<sup>™</sup> is mainly used in ventilation, cooling and climate control systems. This temperature sensor is available with 0...10 V (TRV) or 4...20 mA (TRA) output signal options and offers six different range settings. The temperature sensor is made of high-quality material and manufactured using state-of-the-art production methods. To protect the sensors inside the stem against moisture and mechanical stress, the stem is available with an epoxy powder coating option.

### Technical Data - air2guide<sup>™</sup>

<b>Nominal size</b>	2-1/8 x 3/4" (= 55 x 20 mm)
<b>Ranges</b>	Factory set at +32 °F...+122 °F (0...50 °C) Additional ranges to select via jumper: -58 °F...+122 °F (-50 °C...+50 °C) +5 °F...+95 °F (-15 °C...+35 °C) +14 °F...+248 °F (-10 °C...+120 °C) +32 °F...+320 °F (0 °C...+160 °C) +32 °F...+482 °F (0 °C...+250 °C)
<b>Accuracy @ 70 °F</b>	± 1.0% of full span
<b>Measuring sensors</b>	Pt1000 and Ni1000 RTDs
<b>Output signal</b>	Version TRV: 0...10 V 3-wire, min. load 5 kOhm Version TRA: 4...20 mA 2-wire
<b>Ingress protection</b>	NEMA 4 (IP 65)
<b>Power consumption</b>	Typically 0.35 W / 0.82 VA
<b>Stem material</b>	316 SS
<b>Stem dimensions</b>	7.55 x 0.275" (192 x 7 mm) Other lengths available upon request
<b>Temperature limitations</b>	Head temperature: -31 °F...+194 °F passive (Pt 1000 and Ni 1000) -31 °F...+160 °F active (TRV and TRA) At stem: Standard: -58 °F...+320 °F High temperature version: -58 °F...+500 °F
<b>Electrical connection</b>	PG gland M16
<b>Weight</b>	5.2 ounces (150 grams)

## Type A2G-65

### Applications

- For temperature control and prevention of frost damage to water heating coils in ventilation and air conditioning systems
- The SPDT switch can be used to initiate the following frost-protection measures:
  - Ventilator OFF
  - External air damper CLOSED
  - Heating coil valve 100% OPEN
  - START of heating coil pump
  - Turn off chiller (condenser) and air humidifier
  - Activation of visible or audible frost warning alarms

### Product Features

- Automatic resetting feature
- Small dead band
- High switching repeatability
- Easy mounting
- Comes standard with mounting accessories

The **air2guide<sup>AFT</sup>** frost protection thermostat features an antifreeze function and is an essential product for systems in which the temperature is not allowed to drop below a certain fixed temperature. Typical applications include air heaters in air conditioning systems and heat exchangers in cooling systems.

Technical Data - air2guide <sup>AFT</sup>	
<b>Nominal size</b>	4-3/4 x 3-1/8 x 2" (120 x 80 x 50.4 mm)
<b>Adjustable set point range</b>	Factory set at 41 °F (5 °C) Adjustable set point from +14 °F...59 °F (-10 °C...+15 °C)
<b>Reset feature</b>	Automatic (manual reset optional available)
<b>Design standards</b>	CE conformity: 2004 /108 / EG electromagnetic compatibility (EMC) Product Safety: 2001 / 95 / EC product safety EMC: per EN 60730-1: 2002 Product safety: per EN 60730-1: 2002
<b>Switch type</b>	SPDT switch
<b>Switch capacity</b>	Max. 250 V AC, max. 10 A
<b>Dead band</b>	</= 4 °F, ± 2 °F (</= 2 °C, ± 1 °C)
<b>Repeatability</b>	± 1 °F (± 0.5 °C)
<b>Ingress protection</b>	NEMA 4 (IP 65)
<b>Capillary material</b>	Copper alloy
<b>Capillary length</b>	Standard: 9' (3 m) Optional: 5.5'(1.8 m) or 18' (6 m)
<b>Capillary tube filling</b>	R507 refrigerant
<b>Material</b>	Lower body: PA GK30 Cover: clear ABS
<b>Electrical connection</b>	PG gland M16

# Duct Sensor for Relative Humidity and Temperature

## Type A2G-70

### Applications

- For measuring the relative humidity and temperature of gaseous media in heating, ventilation and air conditioning systems
- Designed for PLCs and other control and display panels

### Product Features

- Easy installation
- Direct assembly into the process
- Compact and robust design
- Comes standard with mounting flange

The measurement of relative humidity and media temperature is becoming increasingly important in control systems. Humidity and temperature controlled ventilation systems are also being used more frequently in air conditioning and ventilation technology. The **air2guide<sup>T+H</sup>** determines the relative humidity and temperature of the ambient air or the air in a duct system using a capacitive sensor with integrated temperature measurement. The sensor signals are converted into standard output signals and made available for further processing. The sensor element is protected by a sinter filter.

### Technical Data - air2guide<sup>T+H</sup>

<b>Nominal size</b>	2-1/2 x 1-3/4 x 2" ( 65 x 45.5 x 50 mm)
<b>Ranges</b>	Humidity: 5...95% rH (operating range 0...100%) Temperature: -4 °F...176 °F (-20 °C...+70 °C)
<b>Output signal</b>	Humidity: 0...10 VDC, min. load 5 kOhm, 4...20 mA optional Temperature: 0...10 VDC, min. load 5 kOhm, 4...20 mA optional
<b>Accuracy</b>	Humidity: ± 3% between 20...80% rh Temperature: ± 1% of measuring range
<b>Temperature limitations</b>	Ambient temperature: -4 °F...+176 °F passive (-20 °C...+70 °C) Media: Max. +140 °F (+60 °C)
<b>Ingress protection</b>	NEMA 4 (IP 65) on connection head
<b>Power consumption</b>	0.5 W / 1.7 VA
<b>Stem material</b>	PVC black
<b>Filter element</b>	Stainless steel, mesh size 80 µm
<b>Stem dimensions</b>	5-1/8 x 3/4"(130 x 19 mm) Other lengths available upon request
<b>Connection head material</b>	PA6, white
<b>Electrical connection</b>	PG gland M16

## Type A2G-80

### Applications

- For measuring the indoor air quality. The greater the output signal of the sensor (0...10 V), the worse the air quality
- The air quality sensor detects oxidizing (combustible) gases such as body odor, tobacco smoke and evaporations from materials (furniture, carpets, coats of paints, glues, etc.)
- In applications where the air quality is essential (i.e., buildings, offices, class rooms, kitchens, etc).

### Product Features

- The set point for the desired air quality can be specified during the installation
- Low consumption reduces energy costs

The **air2guide<sup>VOC</sup>** measures volatile organic compounds (VOC) in the air. VOCs include scent and taste particles, tobacco smoke, building chemicals, solvents, disintegrating gases and products of oxidation. VOCs therefore come from a variety of sources. The **air2guide<sup>VOC</sup>** is a sensitive and cost-effective sensor for measuring air quality. This air quality sensor uses micro metallic oxide semiconductor (MOS) technology for the detection of a variety of VOCs in direct proportion to the amount of CO<sub>2</sub> in the air.

### Technical Data - air2guide<sup>VOC</sup>

<b>Nominal size</b>	3 x 1-3/4 x 2-1/4" (78 x 45.5 x 58 mm)
<b>Power consumption</b>	1.2 W / 2.2VA
<b>Output signal</b>	0...10 V, min. load 10 kΩ
<b>Warm-up time</b>	30 minutes
<b>Temperature</b>	Ambient -4 °F...+122 °F (-20 °C...+50 °C)
<b>Humidity range</b>	Max. 85% rH, not condensating
<b>Ingress protection</b>	IP 42
<b>Weight</b>	5.2 oz (150 g)

## Type A2G-85

### Applications

- A CO<sub>2</sub> sensing system uses real time CO<sub>2</sub> measurements to determine actual occupancy during the day. A system using the CO<sub>2</sub> sensor adjusts outside air delivery to provide only the amount of ventilation needed, thus virtually eliminating 100% of excessive amount of outside air used in a building
- The CO<sub>2</sub> sensor measures and records carbon dioxide in PPM in occupied building spaces

### Product Features

- Easy installation
- Maintenance free due to automatic self calibration technology
- Compact and robust design

air2guide<sup>CO2</sup>

The **air2guide<sup>CO2</sup>** duct-mountable carbon dioxide transmitter is designed for HVAC applications. The CO<sub>2</sub> sensing element is based on the Non-Dispersive Infrared Technology (NDIR). An auto-calibration procedure compensates for any drifts and guarantees maintenance free service and longevity. Once installed into a duct, a small flow of air will be established by convection through the probe into the transmitter housing and back into the duct. Inside the transmitter housing the air will diffuse through a membrane into the CO<sub>2</sub> sensing element. The complete process inside a closed air loop avoids pollution of the CO<sub>2</sub> sensor. The **air2guide<sup>CO2</sup>** is available with an optional 3 LED display for the CO<sub>2</sub> content.

### Technical Data - -air2guide<sup>CO2</sup>

<b>Nominal size</b>	2-1/2 x 1-3/4 x 2" (120 x 120 x 85 mm)
<b>Range</b>	0...2,000 ppm (parts per million)
<b>Output signal</b>	0...10 V, analogue output max. 10 mA
<b>Supply voltage</b>	15...24 VDC (± 10%)
<b>Accuracy</b>	Typically ± 40 ppm + 4% of measured value
<b>Temperature</b>	Ambient temperature: +32 °F...+122 °F (0 °C...+50 °C) Operation: +32 °F...+122 °F (0 °C...+50 °C), max. 85% rH, non-condensing
<b>Ingress protection</b>	IP 20 per EN 60529 / IEC 529
<b>Power consumption</b>	Max. 3 W / max. 6 VA
<b>Stem material</b>	Galvanized steel
<b>Stem dimensions</b>	11.8 x 1.2" (300 x 30 mm)
<b>Connection head material</b>	Polycarbonate
<b>Electrical connection</b>	PG gland M16
<b>Weight</b>	2.9 lbs.

	Description	WIKA Model	Specification	WIKA P/N
1	Panel Mounting Case	air2guide <sup>P</sup>	Black thermoplastic	40195554
		air2guide <sup>P+E</sup>	Black thermoplastic	40195562
2	Surface Mounting Case	air2guide <sup>P</sup>	Black thermoplastic	40195571
		air2guide <sup>P+E</sup>	Black thermoplastic	40195597
3	Threaded Bezel	air2guide <sup>P/P+E</sup>	Black thermoplastic	40217477
4	Adapter Ring	air2guide <sup>P/P+E</sup>	To adapt gauge to larger panel openings	40229424
5	Duct Connector	air2guide <sup>P-tube/S/E</sup>	For 1/8", 3/16" tube inner diameter	40217507
		air2guide <sup>P/P+E</sup>	For 1/4" tube ID	40217537
		air2guide <sup>P-tube/S/E</sup>	For 1/4" tube ID	40217537
6	Hose Barb Adapters	air2guide <sup>P/P+E</sup>	Straight for 1/8", 3/16" tube inner diameter	40179958
			Straight for 1/4" tube inner diameter	40179966
			Angled for 1/8", 3/16" tube inner diameter	40179974
			Angled for 1/4" tube inner diameter	40179982
			Set of 2x angled and 2x straight for 1/8", 3/16" hose inner diameter	40217728
			Set of 2x angled and 2x straight for 1/4" hose inner diameter	40217736
			Set of 2x angled 1/8", 3/16" hose inner diameter and 2x angled 1/4" hose inner diameter	40217744
			Set of 2x straight 1/8", 3/16" hose inner diameter and 2x straight 1/4" hose inner diameter	40217752
			Straight for 1/8", 3/16" tube inner diameter, with restrictor	40241491
			Straight for 1/4" tube inner diameter, with restrictor	40241513
	Angled for 1/8", 3/16" tube inner diameter, with restrictor	40211483		
	Angled for 1/4" tube inner diameter, with restrictor	40241505		
7	PG Gland M12	air2guide <sup>P+E</sup>		40141241
8	Compression Fitting	air2guide <sup>P/P+E</sup>	Brass, G1/8B x 1/4" pipe inner diameter	40232867
9	Brass Hose Barb Adapter	air2guide <sup>P/P+E</sup>	Brass, G1/8B x hose inner diameter 1/8" up to 5/16"	40232484
10	Tubing	air2guide <sup>P/P+E</sup>	PVC tube 1/8", 3/16" inner diameter, 75 foot roll	40217841
		air2guide <sup>P-tube/S/E</sup>	PVC tube 1/4" inner diameter, 75 foot roll	40217850
		air2guide <sup>P/P+E</sup>	PVC tube 1/8", 3/16" inner diameter, 75 foot roll	40208940
		air2guide <sup>F</sup>		
		air2guide <sup>P-tube/S/E</sup>	Silicone tube 1/4" inner diameter, 75 foot roll	40208958

		air2guide <sup>P-tube/</sup>	Slotted pan head screw M4.8 x 50 mm steel zinc plated	40213081
		air2guide <sup>S/E</sup>	Slotted pan head screw M3.9 x 19 mm steel zinc plated	40213072
12	Mounting Flange	air2guide <sup>T</sup>	Black plastic	40212360
		air2guide <sup>T+H</sup>	Black plastic	40212351
13	Static Pressure Tips	air2guide <sup>P/P+E</sup>	1/4" hose barb, extension length 4"	40232956
			1/4" hose barb, extension length 6"	40232964
			1/4" hose barb, extension length 8"	40232972
			1/8" to 1/4" hose barb, extension length 4"	40232981
			1/8" to 1/4" hose barb, extension length 6"	40232999
	1/8" to 1/4" hose barb, extension length 8"	40233006		
14	Filling liquid	air2guide <sup>P-tube</sup>	Display fluid, red, 0.786 kg/dm <sup>3</sup> specific weight	40213714
15	Limitation Labels - Red/Green	air2guide <sup>P-tube</sup>	40213731	
16	Weather Protection Hood	air2guide <sup>P/P+E</sup>	For panel mount version only	40241564

**ISO 9001  
Certified**

For over 60 years, WIKA Instrument Corporation has continuously advanced pressure gauge, transmitter and temperature measurement instrumentation. As the global leader in lean manufacturing, WIKA offers a broad selection of stock and custom instrumentation solutions, which are often available for distribution within days. Producing over 43 million gauges, diaphragm seals, transmitters and thermometers worldwide annually, WIKA's extensive product line provides measurement solutions for any application. The WIKA sales team, along with its customer service and technical staff members, are ready to share their extensive product and industry knowledge to make your business experience with WIKA productive and progressive.

**Low Pressure DP Gauge with  
Electronic Signal Output**

**A2G-15**

**Differential Pressure Transmitter**

**A2G-50**

WIKA provides distinctive service and support to our channel partners and customers:

- Award winning U.S.-based manufacturing, sales and ordering customer service and technical support
- Certified technical specialists who conduct Best Practice Instrument Reviews with performance improvement reports
- An in-house engineering team for product customization and innovation
- Proven capabilities to connect with customer business processes for ordering and inventory management
- Web-based customer service features, including RFQs, literature request and competitor product cross reference
